# React 2023

## What's in this playlist?

A quick overview of the latest advancements in React ecosystem and a refresher of the basics.

## React basics

Router

Fiber

Fragments

Portal

Async Rendering

Props, State and now Context

## Hooks

Added in v16.8

Supercharge react components with new features

- useState replaces class with func component
- useEffect replaces lifecycle methods
- useReducer & useContext replaces Redux
- useMemo & useCallback reduces unnecessary expensive function calls

Resources: compressedfm hooks brain dump

Notes

KCD: can keep RQ for server state then use state hook and context and no redux

Suspense (think "suspend")

lazy load components

Server Components

Experimental in v18.2

Forget

Other stuff popping

SSR

Side Effect

Difference between react query and relay
